## CONSULTING

## HINTERVIEW TIPS FOR CANDIDATES

Hinterview is a video interviewing tool designed to give you the opportunity to add more information to your application before you're invited to a face-to-face interview with the client.

### WHAT TO EXPECT

---

1. Your Kingsley consultant will arrange a Hinterview at a time to suit you.
2. At the time of your Hinterview, your recruitment consultant will send you a link to follow to login online. You will then be on-screen with your consultant who will then give you plenty of warning before they start recording. They will also let you know when the recording has stopped.
3. Your consultant will then submit your Hinterview and CV to the client and update you directly with any feedback.

### BEFORE YOU START - TECHNICAL

---

If you're using an iPhone or iPad, download the Hinterview app in advance.

If you're using a desktop computer or Android device, please use Google chrome or Firefox web browser.

Make sure your microphone and camera are working prior to following the link to start the Hinterview session.

Hinterview requires a good internet connection; before you start close any applications which may use the internet in the background.
